

ABOUT US

Medi-Rent offers a range of specialist medical equipment for rent to medical institutions, practitioners and businesses. Our 25 years of experience has given us a comprehensive understanding of our medical equipment, so we know we can genuinely deliver the very best information and service to our clients.

Looking after our customers is key.

We pride ourselves on our detailed knowledge of our products including their operation, application and service requirements. Ordering with Medi-Rent is quick and easy with knowledgeable customer service representatives ready to take your call. We deliver Australia-wide and can provide set-up and instruction at your business site.

Commitment to clinical efficacy.

Our equipment is hand-picked to fit with our company values and code of ethics. It's important to us that our products are grounded by good science so that we can stand by their claims to provide improved health outcomes. We continue to stay abreast of the latest clinical research in the industry to ensure we are providing credible solutions. Medi-Rent is committed to providing education and in-servicing to healthcare providers and businesses on the use and application of our systems.

LIFE STATION CARDIAID

Seconds to act. Minutes to survival. A lifetime of difference.

Takes the fear out of users deciding whether to act:
 Life Station CardiAid delivers treatment if required, without needing to press a button.
 Automatically switches on by simply opening the cover.
 Apply electrodes as instructed and CardAid takes control.

(Adapted from Larsen et al, 1993. Annals Emergency Medicine)

AUTOMATED EXTERNAL DEFIBRILLATOR

Seconds to act. Minutes to survival. A lifetime of difference.

CARDIAID LIFE STATION

WHY PUBLIC ACCESS DEFIBRILLATION?

Sudden cardiac arrest (SCA) can strike any person, anywhere, anytime. When someone collapses from SCA, immediate defibrillation and cardiopulmonary resuscitation (CPR) are essential for any chance of recovery.

Professionals agree that defibrillation should be provided as early as possible, preferably within the first 3-5 minutes. Even with the fastest emergency medical service system, paramedics may not be

able to reach the victim on time. This results in the necessity of the lifesaving defibrillation to be delivered directly at the emergency site by any responder.

CardiAid Automated External Defibrillator (AED) is specially designed for public-access use, to provide life-saving defibrillation within the critical first minutes, until the professional care is available.

CardiAid AED can be used by anyone on the street to save a sudden cardiac arrest victim.

FEATURES

- Guides the user with clear verbal and visual instructions throughout the process, including CPR assistance with metronomic signals for maximum efficiency. All steps are ensured to be applied accurately even if the responder has limited knowledge or experience.
- Provides the most effective treatment with its advanced detection algorithm and current-based biphasic defibrillation technology.
- Completely safe to use. Electroshock cannot be delivered unless it is indicated as necessary by the device.
- Automatically switches on by simply opening the cover.
- Pre-connected electrodes help save time and make the process simpler for the user.
- Paediatric treatment is available with special electrodes which automatically activate paediatric mode.
- High battery capacity to support up to 200 shocks/20 hours of monitoring.
- Stores maximal ECG and incident data which can be obtained easily through Bluetooth or the Info button (incident data only).
- Easily adaptable to future changes in resuscitation guidelines with configurable functions like voice prompts, CPR duration, CPR sequence; and chest compression frequency.

SERVICE YOU CAN RELY ON

Medi-Rent provides an effective service program (including periodical maintenance, battery & electrode replacement and special function tests) to ensure your machine is always ready for use.

With staff turnover and human error, why risk relying on your staff to maintain this critical equipment when Medi-Rent can ensure its optimum function for you?
